

LCD function

Display module is used for field adjustment, all the parameters setting before measuring, complete site configuration, and with internal and external buttons, to ensure its normal use in safe and hazardous areas. (For stainless steel housing, only internal buttons can be used in security zones. The operation methods of buttons are totally same as the means of standard aluminium alloy housing.)

Products with LCD

The display module of products with LCD is installed in the terminals, which can be viewed through the lenses.

Openings in safe area

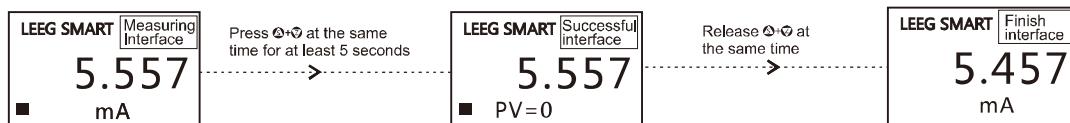

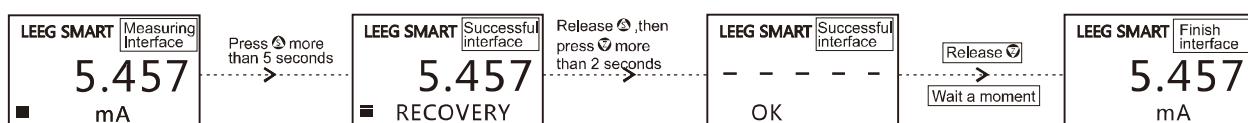

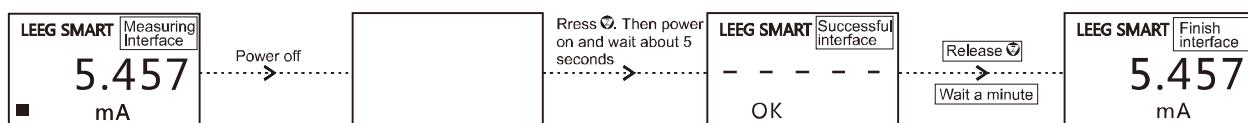

Internal buttons operation in safe area, open the cover, use the internal buttons for operation.

Buttons operation in dangerous area

External buttons operation in dangerous area, turn over the label, use the external buttons for operation.

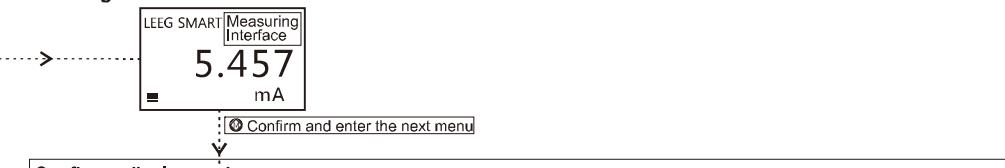

keys operation

For example-factory setting parameters; pressure range -10~100kPa, display unit mA, operate in the atmosphere.

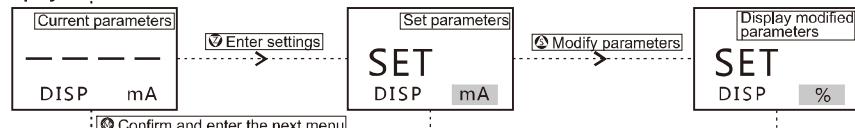

Set PV=0**4mA re-range with pressure****20mA re-range with pressure****Restore factory settings****Method 1:****Method 2:**
